Blue Lance Announces the Addition of Clustered Drive Support in LT Auditor+ 9 for Windows®

April '08 Update Continues to Deliver New Features and Value to LT Auditor+ Users

HOUSTON, TX (PRWEB) — April 16, 2008 — Blue Lance, Inc. announced the immediate availability of the LT Auditor+ 9 April '08 Update, which includes enhanced support for auditing activity on clustered drives. The new feature allows LT Auditor+ 9 users to accurately monitor, alert and report all activity on clustered drives and the mounted volumes contained within.

“The ability to accurately monitor, alert and report on clustered drive and mounted volume activity is critical to auditors in the areas of security and compliance” said Peter Thomas, Chief Technical Officer at Blue Lance. “LT Auditor+ not only reports on clustered drive activity, but translates the cryptic raw data into plain English, delivering on our promise of clear, concise, actionable intelligence.”

Cluster support is the latest of 15 major feature additions since Blue Lance began delivering updates in August 2007.

LT Auditor+ 9 April '08 Update Availability

The April '08 update for LT Auditor+ 9 for Windows is now available for immediate download from the Blue Lance web site (<http://www.bluelance.com>). Evaluation versions may be requested via the web site or by calling Blue Lance.

About Blue Lance

Founded in 1985, Blue Lance, Inc. is a leading developer of software solutions that satisfy IT security compliance requirements for ensuring the privacy, confidentiality and security

of information assets (GLBA, SOX, HIPAA, FISMA, etc). Blue Lance's products quickly identify insider threat by monitoring and assessing user and administrative security changes in Windows, NetWare and eDirectory environments. Blue Lance's flagship product, LT Auditor+, is used to secure the assets of the world's largest corporations, banks, government agencies, educational and healthcare institutions. For over 22 years, Blue Lance has pioneered the development of audit trail technology for Windows and Novell networks along with a number of firsts in network audit and security, including real-time monitoring, automated filtering of data and secure consolidation of system logs.
